Summary

Experienced Golang Developer with 4+ years of hands-on experience designing, developing, and maintaining scalable backend systems. Strong expertise in Golang-based microservices, high-performance systems, cloud-native architectures, and API design. Proven ability to deliver production-ready solutions while optimizing performance, reliability, and cost.

Technical Skills

Languages: Golang, JavaScript, TypeScript

Frameworks: Fiber, Gin, ExpressJS, ReactJS, NodeJs, Temporal, OpenTelemetry

Databases: PostgreSQL, MongoDB, Redis, Yugabyte

Messaging & Streaming: Kafka, RabbitMQ, AWS SQS, SNS, WebSockets, WebRTC

Cloud Platforms: AWS S3, EC2, Lambda, SQS, SNS, Google Cloud, Firebase

DevOps & CI/CD: Docker, Kubernetes, GitHub Actions, Gitlab CI, CI/CD Pipelines

Observability & Reliability: Prometheus, Grafana, OpenTelemetry, Distributed Tracing, Metrics & Alerting

Security & Auth: OAuth 2.0, JWT, Secure API Design

AI & LLM Engineering: OpenAI, Gemini, Claude, LangChainGo, RAG Systems, MCP

Professional Experience

Software Engineer

2024 – Present

Wits Innovation Lab, Chandigarh, India

- Developed and maintained high-performance backend systems, increasing request throughput by 30% and reducing latency by 25% under peak load.
- Designed and implemented RESTful APIs and Golang-based microservices, reducing inter-service data exchange time by 40%.
- Integrated AWS services (S3, Lambda, SNS) to automate workflows, reducing manual effort by 50%.
- Improved test coverage to 85% using unit and integration tests, decreasing production issues by 20%.
- Integrated AI services (OpenAI, Gemini) into customer workflows, reducing business process turnaround time by 35%.

Software Developer II

2021 – 2024

Searchingyard Software Pvt. Ltd., Bhubaneswar, Odisha

- Led backend development for 5+ production systems across e-commerce and education domains.
- Built event-driven microservices using Golang and Node.js, improving system scalability by 60%.
- Reduced deployment time by 40% through Docker-based CI/CD pipelines.
- Optimized AWS and GCP infrastructure usage, cutting cloud costs by 25% while maintaining 99.9% uptime.

Projects

NPS (National Pension System) 2.0

- Developed scalable Golang microservices for pension account management and real-time transaction processing.
- Designed a high-performance cache service in Go, reducing load on core services and improving retrieval time by 40%.
- Built a modular Notification Service supporting SMS, email, and push notifications.
- Integrated Prometheus, Grafana, and OpenTelemetry with automated CI/CD pipelines for zero-downtime deployments.

Project Qurate

- Developed an Auth Broker Service implementing OAuth 2.0 to centralize authentication across microservices.
- Integrated Temporal workflows to orchestrate authentication, payments, and document processing with retries and state management.
- Built a Document Service using AI/ML models to classify documents and extract structured data.
- Improved observability using OpenTelemetry-based distributed tracing combined with Temporal workflow visibility.

Education

Bachelor of Science in Mathematics

2016 – 2019

M.P.C. Autonomous College, Baripada, Odisha

Certifications

- Backend Development & API Certification — freeCodeCamp

Languages

English, Hindi, Odia
